

Sent via email from RED+F Vendor Notice 09/24/2022

Subject: Requirements Related to COVID-19 Applicable to RED+F Contractors & Service Providers that DO NOT Function as Extensions of Staff 002

As a healthcare organization that prioritizes quality and safety and to assure the health of our patients, staff, and visitors, NYU Langone Health (NYULH) has instituted the following requirements to help stop the spread of COVID-19. They are applicable to all RED+F contractors, service providers, vendors, and consultants (collectively "Contractors/Vendors") and their subcontractors, sub-consultants, and personnel (collectively "personnel") and do not function as extensions of staff. We have separately identified contractors that function as extensions of staff.

CO vaccinated Contractors/Vendors and their personnel who

on any premises owned or operated by NYULH or any of its affiliates are required to be fully vaccinated by October 25 (with their first dose by September 27). Fully vaccinated is defined as 14 days past completion of the vaccine series. There are no exemptions allowed for any reason for any personnel working in or on any NYULH facilities.

Contractors/Vendors will be required to maintain records that provide proof that all personnel who provide services in any premises owned or operated by NYULH or any of its affiliates have been fully vaccinated. Upon request, Contractors/Vendors will provide these records to their NYULH Project/Operations/Facilities/Other Manager or Tenant Coordinator (collectively, the "Manager").

Beginning September 27, 2021 all Contractor/Vendor personnel must carry proof of vaccination status and may be asked to show proof of vaccination status at any time in or on NYULH facilities. Proof may be either hard copy or electronic.

Contractors/Vendors remain responsible for meeting project schedules and deliverables regardless of the vaccination status of their personnel.

Positive COVID-19 Test Reporting

All Contractors/Vendors must immediately report any worker who tests positive for COVID-19 and has been in or on NYULH facilities in the last 48 hours. The report must include the name of the worker, the date and time of the test, and the location of the test. The Contractor/Vendor must make the report to the NYULH Manager.

Contractors/Vendors will also provide written notice to all of their personnel as well as to other personnel whose personnel were likely to have had a workplace exposure, which is defined as follows:

as having been within 6 feet of an infected person (i.e., confirmed COVID positive) for at least 10 minutes any time during the period starting from 48 hours before symptom onset or positive diagnosis until the time the infected person was isolated.

Cleaning/Disinfecting

Contractors/vendors are responsible for following the appropriate CDC cleaning and disinfection recommendations for the immediate work area and equipment used by any individual diagnosed with COVID within the previous 24 hours. If common areas such as bathrooms or shared items have
